

The Paul Scherrer Institute PSI is the largest research centre for natural and engineering sciences within Switzerland. We perform cutting-edge research in the fields of matter and materials, energy and environment and human health. By performing fundamental and applied research, we work on sustainable solutions for major challenges facing society, science and economy. PSI is committed to the training of future generations. Therefore about one quarter of our staff are post-docs, post-graduates or apprentices. Altogether PSI employs 2000 people.

PSI is a pioneer in the field of proton therapy. It conducts technological and clinical research in order to optimize spot scanning proton beam therapy and to extend the spectrum of indications for proton radiotherapy. Besides research activities, PSI provides a clinical program for patients presenting with indications that are accepted by the Swiss Health Care System for proton beam therapy. The Center for Proton Therapy collaborates closely with Departments for Radiotherapy at Swiss Universities and Cantonal Hospitals.

For the Group Clinical Operations we are looking for a

# Senior Radiation Oncologist

as the head of the Clinical Study Office Group

## Your tasks

- Lead of the clinical study office group
- Medical deputy to the Department Chairman
- Supervision of data and information management of clinical patient data for the execution of scientific analyses and studies
- Clinical management and treatment planning of patients undergoing proton beam therapy
- Medical assessments of potential cancer patients for proton therapy
- The active participation in prospective national and international clinical trials
- Analysis of treatment results and submission of data in peer-reviewed medical journals, presentation of clinical results in conferences
- Participation in postgraduate education in proton beam therapy
- Participation in the public representation of the Center for Proton Therapy

## Your profile

You are a board-certified radiation oncologist with substantial clinical experience. Your interests include all of: clinical engagement with patients, scientific research, medical physics and future perspectives of proton therapy. You are interested in collaborating on the integration of R&D projects for special delivery modes and moving targets treatment technologies.

You are passionate about providing exceptional care and compassionate service to those you serve. You have high social competence, an innovative spirit and good communication skills. Your interaction with patients and colleagues from various disciplines in a highly specialized, international team is excellent. You are speaking, reading and writing in German and English. You enjoy collaboration with professionals outside PSI on a national and international basis.

**We offer**

Our institution is based on an interdisciplinary, innovative and dynamic collaboration. You will profit from a systematic training on the job, in addition to personal development possibilities and our pronounced vocational training culture. If you wish to optimally combine work and family life or other personal interests, we are able to support you with our modern employment conditions and the on-site infrastructure.
