DESCRIPTION OF MIP TASK GROUP

Task group name

Nomenclature for interventional procedures

Chair person

Stefano Gianolini (stefano.gianolini@hirslanden.ch)

Aims and roadmap

In the Radiation Protection Ordinance, Art. 36, is stated that in medical radiological practices, a medical physics expert must be appropriately involved, and that the level of involvement must be commensurate with the radiological risk posed by the practice.

The aims of this TG are:

- to list specialities and sub-specialities which are using Interventional Imaging,
- to summarise and classify the interventional procedures, and
- to discuss a consensus for the procedures nomenclature.

Anticipated results

- Report
- Recommendation
- Other (ex: position statement, scientific statement, advice notice, practice guidelines, ...):

Science relevance

A consensus is needed on interventional procedures nomenclature and grouping in order to allow common assessment and comparison of doses.

Professional relevance

Increase involvement of medical physicists in interventional imaging practices

Educational relevance

Information for continuous education and training purposes

Start date: July 2018

End date: June 2019
